

# Waba I.

Factory worker

ID: 5745

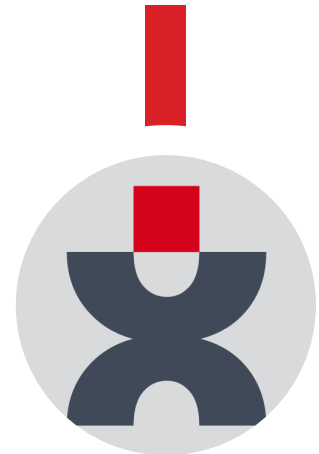

First, am grateful for everything I have in life. This is because of my hard work and passion towards it, most of my work is agricultural in nature because I grew up in a community where we believe the only way to survive is via agriculture and it has done to me a lot of good things that I can not exhaust now. This passion towards agriculture has also made me to win a training and exposure program in ISREAL which has as well made me to learn new ways of doing agriculture which am able to give back to my community.
