

Dilleswara Rao M.

Other

ID: 7207

My name is Dilleswara Rao. I have completed my MSc in Clinical Research and Regulatory Affairs, and I bring over 15 years of experience in the CRO industry. I started my career with Aizant Drug Research, where I worked for almost 10 years as a Clinical QC Incharge. Following that, I joined Admerus Biosciences as a Clinical Operations Team Lead, where I worked for nearly 5 years.

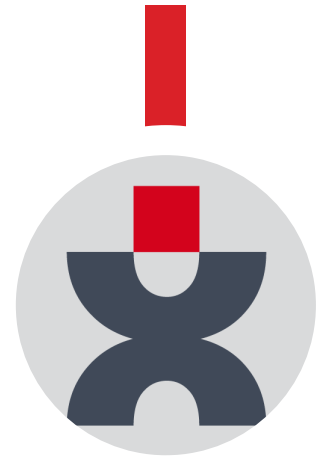

In this role, I was responsible for clinical operations management, BENOC application filing, protocol review, study slot allocation in coordination with the consent department, and overseeing the entire process from subject screening to check-out.

I have handled several major clinical studies, including Iron Sucrose, Amphotericin B, and Transdermal Patch studies, along with more than 100 pilot and pivotal studies, all managed successfully without any major observations. I was also directly involved in FDA audits and several client audits during this time.

After that, I moved to Noah Therapeutics, where I handled project management and clinical operations for about a year. However, due to personal family reasons, I had to step away from work in August last year. Now, I am looking forward to rejoining the industry and continuing my contributions with the experience I have gathered over the years.

General information

Considering industry	Social og sundhed
Type of employment	Unskilled worker
Age	42 (1983)
Original nationality	India
EU Citizenship	No

| Location of residence

Country of residence	Indien
